

RICH VEIN STRUCK SMELTER PROCEEDS WITH EXCELLENT RESULTS

Runs High in Copper and Is Gradually Widening as Depth Is Made

Secretary Franklin F. Towle of the Gibson Copper company received news yesterday by telephone of a strike of rich ore made on the fifth level of the Gibson mine in the course of the development work that is going on there. The extent of the new vein has, of course, not yet been determined in any measure, but at the point where it was first opened, it was six inches wide and in its quality is a veritable pay streak. Although no assays of it have been made yet, the ore now being taken from this vein is apparently of the highest grade and the vein is gradually widening as it is opened up. This rich vein was struck in a winze that is being sunk on the fifth level.

DEVELOPMENTS AT INSPIRATION

(Continued from Page 9)

crosscut has been started west and is now out eighty-five feet.

Men are at work also in the Columbia, Taylor and Mercer tunnels of the Inspiration property. The Taylor tunnel running north is 1100 feet long. The Columbia tunnel runs west and is over 700 feet in length. The Mercer tunnel is also 700 feet long.

The two chum drills of the Inspiration Copper company are now putting down two holes on the end of the property adjoining the land of the Cordova Copper company. One of these holes is only 200 feet from the Cordova line. Another is 400 feet distant from the line and a third one is distant 800 feet. In all of these holes excellent ore has been found. The ore is practically the same as that found in the Joe Bush workings. In each case the ore has been first encountered at a depth of between fifty and sixty feet.

The Inspiration Copper company has just finished building three roomy bungalows for families. These are located near the general mine office. They are handsome dwellings. Two of them have three rooms each and the third one has four rooms. Ground is now being cleared just east of the mine office for the construction of ten two-room cottages for the use of employees. The recent resignation of Superintendent Shovlin of the Inspiration mine has caused considerable regret in Globe district mining circles. During his management of the Inspiration mine Mr. Shovlin has developed on his own initiative the great ore body which has given the Inspiration rank among the most valuable mines in Arizona. Superintendent Shovlin's successor will be T. R. Drummond, now of Los Angeles, but formerly in the charge of the large mill of the Samuel Newhouse interests located at Newhouse, Nevada.

GREATER TONNAGES IN PROPERTY OF LIVE OAK

Interesting Developments at Mines of Assured Producer

The account of the operations now being carried on at the Live Oak seems to be well expressed in the words, "development of greater ore tonnages," for the drifting and crosscutting now being done there on the second and third levels is constantly proving a greater extent of the already large sulphide ore body that has been opened up there.

On the 200 level, the crosscut running west is now seventy feet long and has been in a good grade of ore during the past week. The average in copper is two per cent. On the third level, the north drift has continued to run through chalcocite of an exceptionally fine grade. The ore has a uniform value of three per cent in copper. This drift is now out 350 feet from the shaft, and as it has been in commercial ore all the way, it serves to give some slight idea of the extent of the Live Oak ore body as opened so far. Running west from this drift is a crosscut which is now forty feet long, and here, also, chalcocite of commercial grade has been encountered constantly since the crosscut was first started. The ore being taken from this crosscut averages two and one-half per cent in copper. All the sulphide ores found at the Live Oak mine are of excellent concentrating material.

The management of the Live Oak Development company is naturally very much pleased with the increase of ore tonnages that is being effected by the continuance of operations from week to week. While the future of the Live Oak mine as an important producer is already assured, it is of the greatest interest to watch the extension of the boundaries of this ore body from week to week.

NOTICE

Lim Gow-China ranch, five minutes from town wants those who have horses on his pasture to call for same. He is out of water.

Special rates to Indian Hot Springs. Spend a few days there. It will make you feel like a new person.

About Four Hundred Men at Work at Property of Arizona Commercial

The Arizona Commercial smelter continues to run smoothly and is now turning out about twenty tons of high grade matte each day. This matte is now being shipped to the Old Dominion smelter, about three miles distant, for further refining. Practically all the ore now being received by the Arizona Commercial Copper company's smelter is the product of the company's mine, in which ore is being broken down from the stopes on the fifth and sixth levels. On the seventh level a station is being cut, and as soon as this work is done, drifting on the ore body at the seventh level will be commenced. In about a month a new 1,000 gallon Prescott pump, that is now on the ground will be installed.

About 400 men continued to be employed in the mine and smelter of the Arizona Commercial Copper company, and as soon as some of the neighboring mines have developed ore bodies and begin shipping to the smelter, the force will probably be increased considerably.

CHURCHES

The First Baptist Church

(Hill and Oak Streets)
D. C. Williams, Pastor.
Office 133 South Hill Street.
10 a. m. Sunday school closed on account of scarlet fever.

HARLAN PAGE CORY, Pastor.
Residence corner Fifth and Maple.
Telephone 2423.

Notice to Users of Water

Notice is hereby given to all users of City Water that the following rules adopted by the Common Council will be strictly enforced, to-wit:

Persons residing east of the east side of Sutherland street may sprinkle from 7 to 8 a. m. and from 4 to 6 p. m. on Fridays. Persons residing west of the west side of Sutherland street may sprinkle from 7 to 8 a. m. and from 4 to 6 p. m. on Saturdays. The above rules effective October 29, 1909.

Sprinkling out of hours, permitting waste of water by leaky, defective fixtures, sprinkling streets or roads or any wilful waste of water subjects the person guilty of same to having the water shut off and a charge of \$1.00 imposed for turning on again in addition to the repair of any defective or leaky fixture.

BY ORDER OF THE COMMON COUNCIL,
W. B. LEWIS,
Superintendent Water Department.
